Web Developer

EXPERIENCE

TRIBESWELL | Lead Developer
Dec 2014 – Present | Bloomington, IN

- Since Tribeswell is a Wordpress shop, I have gained expertise in turning a basic Wordpress installation into a fully responsive website.
- I learned Angular 1 from building a hybrid mobile app on the Ionic Framework with Firebase as a backend.
- I also perform weekly and monthly server maintenance tasks to ensure uptime for all hosted sites and I wrote a script to automate this process.

HANAPIN MARKETING | Front End Development Intern
May 2014 – Aug 2014 | Bloomington, IN

- I was assigned with implementing a newly-designed frontend for Hero Pro, a Rails app featuring PPC tools for subscribed readers of PPC Hero which is the world's most popular PPC blog. Unfortunately, the service is no longer available.
- I also provided HTML and CSS support for account managers' A/B tests on Optimizely.

NOTABLE PROJECTS

NECTER | Hybrid Mobile App
gonecter.com
Learned Angular to develop a hybrid mobile app on the Ionic framework. Firebase was implemented as a database. The app is essentially Tinder for groups of up to five friends.

LESSON ZEST | Wordpress
lessonzest.com
Lead the development of Lesson Zest, a subscription site for after-school lesson plan modules. Built on top of Tribeswell's Scratch Theme for Wordpress, it relies on the Advanced Custom Fields Pro and Gravity Forms Stripe Add-On Plugins.

MY BRAIN ON ANATOMY | PHP
mybrainonanatomy.com
Built without a framework, MBOA is developed heavily with PHP. It also utilizes Bootstrap for styling.

EDUCATION

NORTHERN ILLINOIS UNIVERSITY | MS in Mathematics
Jun 2013 | DeKalb, IL

CALIFORNIA STATE UNIVERSITY, NORTHRIDGE | BS in Mathematics
Jun 2011 | Northridge, CA

LANGUAGES

PROGRAMMING
